

RODRIGO FLORES BERTOLOTTI

Corvallis, OR | +1 (541) 602-3008 | rf.bertolotti@gmail.com | linkedin.com/in/rodrigo-bertolotti | github.com/rfbert

EDUCATION

Oregon State University

Corvallis, OR

BS in Computer Science, Honors College — GPA: 4.00 — Dean's List (Winter, Spring 2025)

Expected Jun 2028

- Coursework: Data Structures, Algorithms; Fall 2026: Intro to AI, Computer Networks, Software Engineering I. Prior study: Computer & Systems Engineering, U. de San Martín de Porres, Peru (2024)

EXPERIENCE

Mibanco — Credicorp

Lima, Peru

Artificial Intelligence Intern

Jun 2026 – Present

- Built a parallelized audio-ingestion and speech-to-text pipeline on Databricks (Python, SQL) using Azure AI model endpoints, for integration into production workflows at Peru's largest microfinance bank
- Designed LLM-based interpretation of transcribed speech, orchestrating multiple Azure AI models to extract meaning from recorded audio
- Coordinated the AI team's project planning while automating routine engineering tasks with LLM-assisted tooling

TRUE (Trustworthy and Responsible) AI Lab, Oregon State University

Corvallis, OR

Undergraduate Researcher, URSA Engage — LLM Fault Resilience

Nov 2025 – Present

- Evaluated robustness of 1B–8B Llama 3 models to hardware bit-flip faults: built a gradient-guided attack framework and contributed evaluation code to the lab's fault-injection harness (PyTorch, Hugging Face), run at scale on an A100 Slurm HPC cluster
- Benchmarked 7 fault-tolerance defense methods against 2 classes of adversarial bit-flip attacks (stealth and damage) on GSM8K, with DROP and TriviaQA sweeps in progress
- Co-authored manuscript on cross-scale model resilience, a speculative-decoding-based fault detection and correction defense; contributed mitigation implementations and trade-off analysis

Oregon State University Foundation

Corvallis, OR

Digital Technology Student Assistant

Jan 2026 – Present

- Built data visualizations and summary reports from operational datasets for institutional reporting; maintained production web pages in Sitefinity CMS

Universidad de San Martín de Porres

Lima, Peru

Python Course Assistant

Jul 2024 – Aug 2024

- Mentored students on Python assignments and debugging, graded with detailed rubrics, and led 5+ study sessions

PROJECTS

Internship Scout | TypeScript, Next.js, Prisma, PostgreSQL, Docker, GitHub Actions

Jul 2026 – Present

- Built a full-stack internship-discovery agent: a daily pipeline that scrapes and dedupes postings, applies a deterministic eligibility rules engine plus evidence-based LLM scoring, and tracks applications on a kanban board
- Engineered for reliability with idempotent agent runs, Vitest unit tests, and Playwright end-to-end tests in CI

AI Productivity Automation System | Python, Google Workspace APIs, Telegram, Notion

May 2025

- Automated 12+ recurring scheduling and communication tasks by integrating 5 platforms (Google Calendar, Gmail, Telegram, Notion, Google Sheets), sharply reducing manual scheduling errors

SKILLS

Languages: Python, SQL, TypeScript, C++

ML & Data: PyTorch, Hugging Face Transformers, scikit-learn, NumPy, Pandas, LLM evaluation

Systems & Tools: Databricks, Azure AI, Linux, Slurm/HPC, Git, Docker, Jupyter

AWARDS, LEADERSHIP & CERTIFICATIONS

URSA Engage Undergraduate Research Award — OSU's competitive, stipend-funded undergraduate research program (TRUE AI Lab)

Alpha Lambda Delta National Honor Society — Vice President, OSU chapter

Diploma in Artificial Intelligence, USMP (2025) — final grade 98%; 100% in Fundamentals, Generative AI, Applications

Certificates: AI Fluency for Nonprofits (Anthropic, 2026); Google — Artificial Intelligence & Productivity (Santander Open Academy, 2026)

Volunteer Organizer — led community donation and food drives benefiting 65+ children and families (2023)
